

5th Grade Summer Math

Incoming 5th grade students should be proficient in multiplication and division facts. Please practice these facts daily using flash cards or games.

The learning programs, IXL and Freckle, will be accessible to students this summer through their ClassLink account. On IXL, students should practice using the "IXL Summer Boost" skill plan for 4th grade. On Freckle, students can practice their Math skills on Adaptive Math based on their current Math level.
